Managing Risk Together

Risk Management Program Funding

We listened to your suggestions to improve our Risk Management services. We have combined existing programs (including the grant program) into one comprehensive service.

There are no formal applications to complete. Member requests will be evaluated and Members will be provided with guidance tailored to meet their specific needs, claims history, timeline, etc. Simply contact PennPRIME Trust at info@pennprime.com.

OUR FOCUS GOING FORWARD IS TO UTILIZE Trust resources (people, time, finances) in the most cost effective/efficient manner in the best interests of the individual member and the Trust as a whole. To that end, we will be approaching Member requests with a more investigative methodology to effect a better solution.

The following requests will be given top priority:

1. Innovative Member/Owner ideas that will be proactive towards preventing/reducing the frequency or severity of claims.
2. Safety Committee training.
3. Defensive Driving training by PennPRIME-approved providers (i.e. John Rock).
4. Safety training/equipment.
5. PELRAS (Public Employers Labor Relations Advisory Service) Conference attendance.
6. General liability training from PennPRIME attorneys or approved providers.
7. Management training in Safety/Risk from PennPRIME-approved providers.
8. General management training from PennPRIME-approved providers.
9. For accredited police departments (or those in the process) – implementation of PowerDMS Software System for proof tracking or attendance at the PLEAC Accreditation Manager's Conference
10. For any police department seeking policies from Lexipol or CORDIC wellness application.

Members may be asked to meet one or more of the following requirements or other requirements pertinent to their specific request.

1. For start-up operations, the Member/Owner must commit to having the funds to continue the process after the initial year funded by PennPRIME.

Example: PennPRIME agrees to fund Taser Instructor training for a Police Department implementing Taser use for the first time. The Member/Owner must commit to providing continuing resources for updated policies, training and equipment.

2. For conference attendance, the Member/Owner must commit to using the information gained during the conference in a tangible manner within six months of attending the conference.

Example: PennPRIME agrees to provide registration, accommodations and mileage to the PELRAS Conference. The Member/Owner must agree to develop a new personnel policy or update.

3. For general safety training, the Member/Owner must commit to a specific number of PennPRIME attendees. If the Member/Owner does not have enough of their own employees to fill the attendance requirement, the Member/Owner can:
 - a. Actively pursue combining efforts with a nearby PennPRIME Member/Owner
 - b. Agree to pay the difference between the minimum attendance requirement and their number of attendees
 - c. Invite nearby entities that are PennPRIME Members/Owners and charge a fee.
 - d. Have the training via webinar.
4. For equipment funding, the Member/Owner must have a written procedure approved by PennPRIME, must have all other necessary equipment/resources to perform the operation safely, must commit to completing training on the procedure, hands-on training as necessary and other requirements as pertinent to the specific request.

Example: PennPRIME agrees to provide funding for a tripod, harness and winch for Confined Space Entry (CSE). The Member/Owner must adopt the PennPRIME sample procedure for CSE prior to funding, must commit to annual training on the policy for all affected employees, must commit to annual hands-on training for affected employees by a qualified trainer, must provide a list of all other necessary equipment (i.e. gas monitor).
